

After-School Science Enrichment Program

Mad Science activities are so fun that children forget they are learning! These recreational science programs are designed to help all kids learn to enjoy science. Mad Science after school enrichment topics are on a three-year rotation, so repeat students should not see a specific science class again for a long time.

Winter 2019: Secret Agent Lab

Calling all agents! This program is part forensics and part "spy science". Step into the shoes of a detective—uncover the science involved in evidence gathering and analysis. Students will create, collect, and analyze evidence and discover what skills are necessary as a crime scene lab technician. They examine clues and get hot on the trail of a culprit, and then connect the dots using science to help solve a crime in a hands-on investigation. Look out 007! From edible messages and decoding clues, students will have the opportunity to check out some of the skills that spies must master in this hands-on journey into the world of espionage. Take home projects include an ultraviolet Fingerprint Finder kit, Spyglasses that let you secretly watch people who are behind you, Spy-noculars, a Secret Code Breaker, and an Inspecti-kit for evidence collection.

Mad Science of the Mid-Hudson (845) 294-5434

Registration **MUST** be completed online @ midhudson.madscience.org
6- Week Program Cost: \$106.00

Wednesdays at Putnam Valley Elementary School (*immediately after school*)

Time: 3:30 – 4:30 PM

Dates: Feb 6, 13, 20, 27, March 6, 13.
